# Data check

Given the wide range of RASTAL decoration options, it is often very helpful to consult with our graphic designers. We will be more than happy to answer any questions you may have.
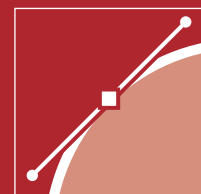

File formats

- Adobe Illustrator (AI)
- Adobe Acrobat (PDF)
- Adobe Photoshop (PDF)
- PS / EPS files
- TIF / JPG conditionally after consultation with the data check department

Notes on producing printing templates

- **Vector data** (e.g. Adobe Illustrator) are preferable

- **Pixel formats** (e.g. JPG or TIF) should have a resolution of at least 400 dpi in the original size

- **Single-colour pixel data** should have a resolution of at least 1200 dpi in the original size

- **Typefaces** must be included or converted into vector paths

- **Image links** should be embedded or sent separately

- **Colour definitions** in Pantone – Solid Coated or HKS. RGB or CMYK colour specifications are converted by us, potentially causing colour shifts

- **White** must always be defined as a full-tone colour

- **File names** should contain letters / numbers but no special characters

- **Line thickness** not less than 0.2 mm

Pixel data

Vector data (preferred)
